## **WHITE ELEPHANT AUCTION**

**NOTE THE EARLY START**

### ***1180<sup>th</sup> meeting, August 27, 2014***

Lloyd Chan presented his program **Getting Excited and Enthralled With Ancients**.

He began with a brief overview, primarily the coinage of the Greek city states, Greek colonies, and the Roman Empire. He focused on the earliest coinage of Ionia and Lydia—electrum coinage. While most pieces are expensive, there are collectable types available. After reviewing other coins of the Greek regions, he noted that coins were originally struck for religious use (offerings for example), civic pride (to commemorate victories in games and war), and for commerce (what we recognize as coins today). Commercial coinage included the stater and the tetradrachm (such as the Athenian owl coinage). Collecting themes include Animals, Architecture, Gods and Heroes, Events, Portraits, and defined series such as the Twelve Caesars. As with most collecting themes, one can choose routes that are inexpensive to very expensive.
