Brief overview of board discussions before the speaker.

Herb spoke on Insurance and its collectibles. He noted that the first insurance is recorded in the laws of Hamurabi around 2100 BC. He traced it through the benefits of the medieval Guilds, and Lloyds of London. Accident and Disability insurance was introduced in the US in the mid 1800s. Hospital prepaid plans started in the 1920s, and Life & Health coverage was offered in lieu of wage hikes during the price controls of WWII.

Herb then showed examples of Insurance-related numismatic, exnumia, and other collectible objects from his collection, including: key fobs, Masonic Protective Association items, identification tags for miners, medals, tokens, encased pennies, and mirrors. He showed a Metropolitan Life Headquarters medal which place later became the Ritz Carlton Hotel, and a Hartford token issued for the PPIE.
